About the editors

David J Williams BSc

Mr Williams is a clinical toxinologist and herpetologist who has specialized in the issue of snakebite, venomous snake systematics and venom research in Papua New Guinea for several years. He is currently involved in a large epidemiological study of snakebite in southern Papua New Guinea. David is a postgraduate student in the School of Public Health and Tropical Medicine at James Cook University in Townsville, Australia.

Dr Simon D Jensen BSc (Hons) MSc (Dist) MBChB FACEM

Dr Jensen is Senior Lecturer in Emergency Medicine at the University of Papua New Guinea's School of Medicine and Health Sciences, and is also Honorary Consultant in Emergency Medicine at Port Moresby General Hospital. Simon sees many victims of snakebite in the Emergency Department at PMGH and has been interested in issues surrounding the management of snakebite in PNG for some time.

Dr Kenneth D Winkel MBBS PhD FACTM

Dr Winkel is the director of the Australian Venom Research Unit at the University of Melbourne, and the President of the Australasian College of Tropical Medicine. The AVRU is involved in research about envenomation in both Australia and Papua New Guinea, as well as research into the safety and efficacy of antivenoms, the use of venom detection kits in the diagnosis of snakebite, and investigations into the venoms and toxins of many dangerous Australasian animals.
